(a) Weight degeneracy along the trajectory
Two experts, $\beta = 1/2$
CFG $w = 1.5$
CFG $w = 2$
CFG $w = 3$
ESS/N
Noising time t (sampling: $1 \to 0$)
(b) Critical guidance scale
$w^* \approx 1.95$
$\mathbb{E}[W^2] = \infty$ beyond
Exact $(\mathbb{E}W)^2/\mathbb{E}[W^2]$
Lognormal proxy $e^{-\mathrm{Var}\log W}$
Monte Carlo, $N = 6 \times 10^4$
Terminal ESS/N
Guidance weight w
